

How to delete all data in android phone

Continue

Go to the Google Accounts page > People & Sharing > Contacts > Contacts > Menu > Trash. On Samsung, open Phone > Contacts > Menu > Manage Contacts > Import or Export Contacts. You may also use a software recovery tool on desktop. This article will walk you through restoring deleted or lost phone numbers on Android and Samsung devices. In most cases, you can recover the number and contact information if your new phone didn't sync properly or you accidentally deleted an important number. When you first set up Android, you must sign in with a Google account to use Google's apps and services, such as the Play Store. Your contacts are automatically backed up to your Google account, which means any lost or deleted phone numbers may still be available. If you haven't signed in to a Google account on your device at least once before, for whatever reason, this method will not be available to you. To recover deleted phone numbers or contacts, you need to use the Google Account Settings feature. This can be done on both a phone and a computer. On a computer or phone, go to the Google Accounts page. If you aren't already logged into the same Google account you use on your phone, make sure to do so. If you're logged into another account or a work account, you'll need to log out first. Using the menu at the top on mobile, or on the side on desktop, open People & Sharing. Scroll down to the Contacts section and open Contacts by tapping on the entry or clicking the Open button. You can also just go directly to Google Contacts. You will now see a list of all contacts saved to your Google account. Open the side menu and select Trash to recover any numbers you've recently deleted. You should now see a list of any deleted contacts, phone numbers, and email addresses. Each entry will detail where they were deleted from, such as the web or a specific device, as well as the date they were deleted. On mobile, tap the contact you wish to recover. Click if you're on a desktop. A menu will appear with options to Delete forever or Recover the contact. To recover, choose the appropriate option, and the details, including the phone number, will be restored to your contacts list. To check if the phone number has been restored, open the Phone app. Select Contacts and then search for the number or name of the contact you restored. Make sure you're opening the Google version. On some devices, you may have both the Google Phone app and a separate Contacts app. Samsung devices have both, for example. Remember, you can use the Google account management page (from Step 1) to back up your data, customize your privacy settings, manage payment methods or subscriptions, and much more. Although not as common, your phone may have contacts stored on the internal memory or a SIM card. It's possible to retrieve deleted numbers from those storage locations on your Samsung phone by using the import and export functions. Here's how to import contacts: Go to Contacts > Menu > Manage Contacts. Tap Import or export contacts and then import. If you have any contacts stored on your SIM card or your internal memory, you will see those sources in the list. Select the source you want to retrieve and then tap import to confirm. Wait for it to finish. You can use the export function to make a backup of your contacts. Yes, you can retrieve deleted numbers directly from your phone without using a computer, but it limits the methods you can use. You will have more opportunities if you have a computer available. For example, you can use recovery software on your computer to restore numbers, contacts, messages, photos, and much more. FAQ How can you move phone numbers from Android to iPhone? Apple has an official app called Move to iOS that can help you make the switch. It transfers all of your contacts, messages, photos, and more. How can you backup contacts on Android? Open the Settings app and select Google > Settings for Google apps > Google Contacts sync > Also sync device contacts > Automatically back up & sync device contacts. Tap the toggle to turn it on and choose which account you want contacts saved to. All current and future device contacts are automatically saved as Google contacts and sync to your Google account. How can you save contacts on your SIM card to your Google account? Google's automatic backup for contacts doesn't work on phone numbers saved to a SIM card. To back up your SIM contacts, you need to import them. While the SIM card is in your device, go to the Contacts app and select Menu > Settings > Import > SIM Card. Thanks for letting us know! Get the Latest Tech News Delivered Every Day Subscribe Tell us why! iCloud On Android Hero (Image credit: Jeremy Johnson / Android Central) Many of us use different devices from various manufacturers and ecosystems, even macOS and iOS (no judgment here). Whether it's a MacBook Pro that we're editing on or the latest iPhone that we're comparing to one of the best Android phones, we use these devices too. If you also have a foot in each ecosystem, you may be wondering how you can access your iCloud data from your Android phone. It's actually easy, if clunky. Don't worry, we'll show you what you need to do to get the best of both worlds. Here's how to access your iCloud data from an Android phone. Open Google Chrome (or your preferred browser) on your Android phone. Go to [icloud.com](https://www.icloud.com). Log in and validate your credentials (Hopefully, you're using some sort of two-factor authentication!). Apple will ask you to trust this browser. Tap Trust. Source: Android Central (Image credit: Source: Android Central) Once logged in, you will be able to access Apple's Photos, iCloud Drive, Notes, Reminders, and Find iPhone (or Find My) apps. Tap on one of these apps (I'll tap on Notes) to access content, add content, or even take screenshots or download content (like photos). Source: Android Central (Image credit: Source: Android Central) It couldn't be simpler, right? True, this is not as ideal as having purpose-built Apple apps on Android (there are only a couple like Apple Music and the Move to iOS apps), but at least there is a way to access some of your most important iCloud data. I should also note that you can access your iCloud account settings in this way as well. And with iOS 15, Android users will be able to answer and participate in FaceTime calls for the first time. Our top equipment picks Why not access that iCloud data on one of the best Android screens available right now? Additional Equipment If you need more storage or want to move from iCloud to Google, consider investing in Google One. Google One (Image credit: Google) Google One (From \$2/mo. at Google) If you're considering moving those documents, photos, and data from iCloud over to the Google side of the fence, you may want to increase your Google account storage. Through Google One, you can add as much additional space as you need for a reasonable fee. Uninstalling an app on a Pixel 4 XL (Image credit: Joe Maring / Android Central) As the owner of a smartphone, whether it's the best Android phone ever or something more affordable, there are a few basics tasks you should know how to do — such as making phone calls, sending texts, checking your email, etc. The longer you have your phone, the more likely it is that it'll fill up with a variety of apps. There's that game your kid told you you to download, the app for the airline you flew once over a year ago, countless social networks you don't really use. You get the idea. Apps are great, but it is possible to have too many of them. Whether your phone is starting to run out of storage or you just don't like how cluttered things are looking, here are two easy ways to uninstall/delete those pesky applications. How to delete apps from the app drawer The easiest way to uninstall apps from your phone is by heading into the app drawer. The whole process takes just a few seconds, and for getting rid of apps, you know you don't want/need, it's the way to go. Swipe up on your home screen to access your app drawer. Press and hold on the app you want to uninstall. After the pop-up appears, move the app around. Source: Android Central This takes you back to your home screen. While still holding on to the app, drag it to the Uninstall option at the top. Let go of the app. Tap OK to uninstall it. Source: Android Central How to delete apps from the settings Alternatively, it's also possible to delete apps from your phone's settings. It's not quite as simple as the above method, but it does give you more information about how much space specific apps are taking up. If you're running out of storage and looking for the biggest offenders, this is a great way to go about cleaning up your phone. Go to the Settings on your phone. Tap Apps & notifications. Tap See all apps below your recently opened apps. Tap on the app you want to delete. Source: Android Central Tap Uninstall. Tap OK. Source: Android Central Just like that, you now have two handy methods at your disposal for deleting apps on your phone. The first one using the app drawer is the simplest way to go about things. Still, the process involving the settings provides additional information that could be quite useful if you're trying to figure out how to free up storage space on Android. Android head logo (Image credit: Android Central) Android 10 has been out for more than a year now, and whether you're excited about its new permission settings for apps or the glorious dark mode, there are plenty of reasons to be eager for it to arrive on your phone. Android 11 has already been available for the Pixel lineup since day one. While we are seeing the likes of Samsung and OnePlus devices getting the latest updates, many handsets are still awaiting the update to Android 10. However, as with all Android updates, there's a difference between when Google launches the final build and when the new software actually arrives on your smartphone. We'll be taking a look at all of the major Android phone makers and breakdown when exactly you can expect an Android 10 update for your device. Let's dive a bit deeper and find out which of the best Android phones have been updated to Android 10. Google Pixel Source: Hayato Huseman / Android Central (Image credit: Source: Hayato Huseman / Android Central) Let's start with Google's own phones, the Pixel series. Android 10 has been guaranteed for every existing Pixel device, with the full list being as follows: Pixel 4a Pixel 4 / Pixel 4 XL Pixel 3a / Pixel 3a XL Pixel 3 / Pixel 3 XL Pixel 2 / Pixel 2 XL Pixel / Pixel XLs of September 3, 2019. Android 10 started rolling out for all of these handsets, making them the first batch of phones to be treated to 10's goodness. Samsung Source: Nirave Gondhia / Android Central (Image credit: Source: Nirave Gondhia / Android Central) Samsung is the big player in the Android world, as well as the biggest player in the entire smartphone world. The needle moves a fair bit when Samsung updates a phone. So far, Samsung has issued its Android 10 update to the following devices: Galaxy Note 20 / Note 20 Ultra Galaxy S20 FE Galaxy S20, S20+, and S20 Ultra Samsung Galaxy Z Fold / Z Fold 2 Galaxy Z Flip / Z Flip 5G Galaxy S10, S10+, S10e, and S10 Lite Galaxy S9 and S9+ Galaxy Note 10, Note 10+, and Note 10 Lite Galaxy Note 9 Galaxy M11 Galaxy M51 Galaxy A71 Galaxy A71 5G Galaxy A70/A70s Galaxy A51 Galaxy A50 Galaxy A42 5G Galaxy A31 Galaxy A30s Galaxy A21 / A21S Galaxy A20/A20s Galaxy A11 Galaxy A10LG Source: Alex Dobie / Android Central (Image credit: Source: Alex Dobie / Android Central) In recent years, LG has become notorious for slow, inconsistent Android updates. It pains us to say that, but that's the fact. As of right now, LG has updated the following phones to Android 10: LG Wing LG Velvet LG G8LG G8X LG G7 / G7 One LG G7 ThinQ + LG V60LG V50LG V40LG Q60LG Stylo 5LG K30LG K50LG K50sLG K61LG Q60Huawei Source: Alex Dobie / Android Central (Image credit: Source: Alex Dobie / Android Central) Huawei is one of the world's largest smartphone companies, with its devices ranging from high-end flagships to low-cost budget options. Almost all of the company's current handsets have already been updated to Android 10, including: Huawei P40 series Huawei P30 series Huawei P20 series Huawei Mate 40 Series Huawei Mate 30E Pro 5G Huawei Mate 20 series Huawei Mate X / Mate Xs Huawei Y7a Honor 30 / 30 Pro Honor 20 / 20 Pro / 20 Pro Lite Honor 30S Honor 30i Honor 20S Honor View 20 Honor 10X Lite Honor 10 Honor View 10 Honor 9A Honor 9X / 9X Pro Honor 8X Motorola Source: Joe Maring / Android Central (Image credit: Source: Joe Maring / Android Central) Motorola used to be on top of its game when it came to Android updates, but in recent years, the company has gotten slower and more inconsistent with how it handles new software. As of right now, these are all of the Motorola phones that have successfully gotten their Android 10 update: Motorola Edge / Edge+ Moto G 5G Moto G9 Power Moto G8 Plus Moto G8 Play Moto G7 Moto G7 Play Moto G7 Power Moto G7 Plus Moto G Fast Moto Z4 Motorola One / One 5G Motorola One Action Motorola One Fusion+ Motorola One Macro Motorola One Vision Motorola One Zoom Motorola RAZR / RAZR 5G Moto E (2020) Moto E7 Plus Moto G9 Plus Moto G9 Play Motorola One 5G Ace Moto G Stylus (2021) Moto G Power (2021) Moto G Play (2021) There are a few other phones that we expect to get Android 10 at some point, with those being: Nokia Source: Joe Maring / Android Central (Image credit: Source: Joe Maring / Android Central) When it comes to Android updates, one company that stands out among the rest is Nokia. Led by HMD Global, this current iteration of the Nokia brand has become synonymous with phones that have clean software and get timely, consistent updates. Nokia's been hard at work updating a bunch of its phones to Android 10, with all of the following now running the software: Nokia 8 V 5G UW Nokia 9 PureView Nokia 8.3 5G Nokia 8.1 Nokia 8 Sirocco Nokia 7.2 Nokia 7.1 Nokia 7 Plus Nokia 6.2 Nokia 6.1 Plus Nokia 6.1 Nokia 5.3 Nokia 5.1 Plus Nokia 4.2 Nokia 3.4 Nokia 3.2 Nokia 3.1 Plus Nokia 3.1 Nokia 3V Nokia 2.4 Nokia 2.3 Nokia 2.2 Nokia 1 Plus Nokia 1 Nokia 5.1 Nokia 3.1 Nokia 2.1 One Plus Source: Apoorva Bhardwaj / Android Central (Image credit: Source: Apoorva Bhardwaj / Android Central) OnePlus touts fast updates and a fast track to the latest version of Android as a feature of its phones. The company has repeatedly proven that platform updates can be done quickly and fairly bug-free, and that hasn't changed with Android 10. Here are the phones for which Android 10 is now available: OnePlus Nord N10 5G One Plus Nord N100 OnePlus Nord One Plus 8 / 8 Pro One Plus 7T / 7T Pro One Plus 7 One Plus 7 Pro One Plus 7 Pro One Plus 6T One Plus 6 One Plus 5 / 5T Despite being launched with Android Nougat back in 2017, the One Plus 5 and 5T were updated to Android 10 on May 27th, 2020. Odds & Ends Source: Apoorva Bhardwaj / Android Central (Image credit: Source: Apoorva Bhardwaj / Android Central) Here are the phones that don't quite belong in our categories above but still deserve a shout-out for rocking Android 10: ASUS ZenFone 7 / 7 Pro ASUS ZenFone 6 ASUS ROG Phone 2 / ROG Phone 3 ASUS ZenFone Max Pro (M1) ASUS ZenFone Max M2 Essential Phone Microsoft Surface Duo HTC Desire 21 Pro 5G Sony Xperia 1 Sony Xperia 5 / Xperia 5 i Sony Xperia 10/10 Plus Sony Xperia 10 i Sony Xperia XZ3 Sony Xperia XZ2 Sony Xperia XZ2 Compact Sony Xperia XZ2 Premium TCL 20 5GTCL 10 5G UW TCL 10L TCL 10 Plus Xiaomi Mi A2 Xiaomi Redmi Note 8 Xiaomi Redmi 7 Xiaomi Mi 10 Xiaomi Redmi K20 / K20 Pro POCO F1 POCO M2 Pro POCO M3 POCO X2 POCO X3 ZTE Axon 10 Pro (Europe only) ZTE Axon 20 5G Nubia Red Magic 5S Android 10: Everything you need to know!
